DETAILED ACTION

Claims 1-46 are pending in this application.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, 22-37 and 44-46, drawn to a method and a device to detect and operate a ventilator by the use of the linear combination of parameters related to inflowing flow, pressure, and volume and drawing a prediction curve.

Group II, claim(s) 19-21 and 38-41 drawn to a method and a device to operate a ventilator by averaging inspiration times and the timing of other time related parameters in the respiration cycle.

Group III, claim(s) 42-43, drawn to a device determining a desirable duration of the inflation phase and measuring flow at the end of such desirable duration.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Applicant is entitled to a process and an apparatus or means specifically designed for carrying out the said process. Since this application contains claims to more than one of the

combinations of categories of invention set forth in § 1.475 (b), unity of invention is not be present.

Any dependent claims that depends from more than one invention was included in the first claimed invention, as per § 1.475 (d).

Given the complexity of the restriction requirement, with claims 4-14, 17-18, 2-23, 27-37, 41, and 44-46 being multiple dependent claims, a telephone call was not to request an oral election to the above restriction requirement.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
3. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CLINTON OSTRUP whose telephone number is (571)272-5559. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
